## EDUCATION

Navgujarat College of Computer Application (GTU)

Oct 2022 – June 2024

Bachelor of Computer Applications (BCA) – **CGPA: 7.00**

Ahmedabad, Gujarat

## SKILLS

- Fullstack Development
- Backend Development
- Frontend Development
- PHP
- Laravel
- RESTful API Design
- MVC Architecture
- Eloquent ORM
- JWT Auth
- Spatie Permission
- Queues & Observers
- React / Inertia.js
- Blade Templating
- TailwindCSS
- HTML5 / CSS3
- JavaScript
- MySQL / SQLite
- Git / GitHub
- GitHub Actions (CI/CD)
- Linux (Ubuntu)
- Docker (basic)
- Agile / Scrum

## WORK EXPERIENCE

Purvsoft Technologies 

Jan 2026 – Present

*Laravel Developer*

Ahmedabad, Gujarat

- Sole backend developer independently delivering **5 production Laravel applications** across Ed-Tech, HealthTech, SaaS, and Enterprise verticals.
- Architected **multi-tenant RESTful APIs** with **50+ endpoints per project**, implementing Sanctum token auth, Spatie RBAC (Role Base Authentication), and ownership-level authorization guards to ensure data isolation.
- Integrated third-party services including **Razorpay** (payments & payouts), **SMS OTP**, **Firebase FCM** (push notifications), and **n8n webhook automation**, reducing manual workflow steps.
- Established **CI/CD pipelines via GitHub Actions** for automated testing and deployment; configured **PDF generation pipelines** (mPDF/DomPDF) and scheduled reminder queues used in production daily.

## INTERNSHIP

Infotronix Pvt Ltd 

Sep 2025 – Dec 2025

*PHP/Laravel Intern*

Ahmedabad, India

- Gained hands-on experience with **PHP, MySQL, and MVC architecture** in a professional Agile development environment, contributing to **3+ backend modules** within the first month.
- Participated in backend feature development, **database schema design**, and peer code reviews under senior developer mentorship, improving code quality and review turnaround.

## PROJECTS

**GraphicPosts Backend API** | PHP, Laravel 12, MySQL, Firebase, Swagger

- Built a production-ready **RESTful API** managing secure authentication, dynamic business profiles, greeting categories, and **tiered subscription packages** for a B2C graphic content platform.
- Integrated **Firebase Cloud Messaging (FCM)** to deliver targeted real-time push notifications, improving user engagement; implemented **Laravel Sanctum** for token-based API security.
- Maintained **automated API documentation** using L5-Swagger (OpenAPI 3.0), enabling faster onboarding for frontend teams and reducing integration queries.

**Gym Management System** | Laravel, React, Inertia.js, Tailwind CSS, Firebase

- Developed a full-stack **SPA** for comprehensive **member, staff, and lead management**, health metrics tracking, and **payroll processing** serving a live gym facility.
- Designed an **automated QR-code attendance system** integrated with real-time data visualization using **Recharts**, replacing a fully manual check-in process.
- Delivered **PDF and Excel export** reporting and connected **Firebase FCM** for real-time push notifications, improving staff communication efficiency.

## Office Management System [↗](#) | [Laravel](#), [Blade](#), [Tailwind CSS](#), [PHP](#)

- Built a comprehensive **HR management system** with distinct admin and employee portals, implementing **granular RBAC** via Spatie to enforce fine-grained access across departments.
- Developed backend modules for **automated attendance tracking**, leave request workflows, and **custom holiday calendaring**, eliminating manual HR data entry.
- [View Source Code](#)

## Institute Fees Management System | [Laravel](#), [React](#), [Inertia.js](#), [Tailwind CSS](#)

- Engineered a **multi-tenant SaaS platform** managing institutes, employees, and students with **Spatie RBAC** ensuring strict data isolation across tenants.
- Built core modules including **Student Fees & EMI Tracking**, **Bulk CSV Data Imports** (1000+ records), and **WhatsApp Notification** top-ups to improve payment collection rates.
- Implemented an automated **subscription and payment expiry system** that enforced plan limits and triggered renewal workflows, reducing overdue accounts.

## JP Homes – Household Service Management [↗](#) | [Laravel 12](#), [Sanctum](#), [mPDF](#), [MySQL](#), [Tailwind CSS](#), [Vite](#)

- Built a full-stack **household service management platform** with RESTful APIs managing clients, domestic workers, supervisors, and **short/long-term service contracts** with real-time expiry alerts.
- Automated **PDF document generation** (agreements, receipts, registrations) via mPDF with **multi-language Unicode support** (Devanagari script), and built an admin dashboard with payment analytics.
- Implemented **token-based auth** via Laravel Sanctum, auto-generated invoicing, and **CI/CD deployment** via GitHub Actions, reducing deployment time and manual errors.

## LMN Service – Nephrology Healthcare Backend [↗](#) | [Laravel](#), [Livewire](#), [MySQL](#), [Sanctum](#), [JWT](#), [Razorpay](#), [Firebase](#)

- Developed a **HIPAA-aware nephrology platform** backend with **multi-role access control** (Admin, Physician, Nephrologist) using Spatie Permissions and **dual Sanctum/JWT authentication**.
- Built **patient management APIs** covering vital signs, lab parameters, radiology reports (X-ray, CT, MRI, Ultrasound, Echo), and automated **PDF prescription generation** via DomPDF.
- Integrated **Razorpay** for full payment lifecycle (order creation, verification, doctor payouts, coupons); connected **Twilio OTP** and **Firebase FCM** for secure auth and real-time notifications.
- Delivered **Swagger/OpenAPI documentation** and **automated CI/CD via GitHub Actions**, enabling reliable, zero-downtime deployments.

## PurvSoft Blog API | [Laravel](#), [Sanctum](#), [Swagger \(L5\)](#), [Vite](#), [Tailwind CSS](#), [MySQL](#)

- Built a **production RESTful Blog API** with full CRUD, **image upload/storage management**, paginated listing, and **SEO-optimized fields** (title tags, meta descriptions, slugs) for content discoverability.
- Implemented **Sanctum token auth** with custom **ownership-verification middleware** to enforce per-blog authorization, preventing unauthorized update/delete operations.
- Documented all endpoints using **L5-Swagger with PHP 8 attributes**, producing an interactive OpenAPI playground that reduced frontend integration time.

## Shakti Masala Inventory System [↗](#) | [Laravel](#), [Tailwind CSS](#), [Vite](#), [MySQL](#)

- Built a full-featured **inventory and sales management system** with real-time analytics, **automated invoicing**, and **partial payment (EMI) tracking** for a manufacturing business.
- Implemented **P&L statement generation**, **product costing**, and **expense tracking** modules, providing owners with actionable financial insights and reducing manual bookkeeping effort.
- Designed dynamic product management with **customizable packaging types** and a **rolling 3-month sales history** to support inventory replenishment decisions.
- [View Repository](#)

## YouTube Clone | React.js, Tailwind CSS, Vite

- Built a **pixel-accurate frontend clone** of YouTube featuring dynamic video playback, Shorts, Subscriptions, and detailed Channel Owner pages using **React.js with component-driven architecture**.
- Implemented **client-side routing and modular UI architecture** supporting Creator Studio Dashboard, Playlists, Watch Later, and History sections.
- Designed a **fully responsive interface** with Tailwind CSS, ensuring consistent UX across mobile, tablet, and desktop viewports.
- [View Source Code](#)
